Projects

Website Development

I was involved in website development projects, where I designed and built visually appealing and functional websites. My role included tasks such as creating layouts, implementing responsive design, coding front-end and back-end functionalities, and ensuring an optimal user experience.

Finance Tracking App

I helped develop a finance tracking app, focusing on features like expense tracking, budget management, and user-friendly data visualization.

Honors and Awards

- 2022, Received a prize for a High score in University Entrance Exam(top 50 in the country).
- 2018, Recognized for top score in Secondary School leaving exam(all subjects A).
- 2020 and 2018, Recognized for successful completion of African Leadership Academy(BUILD) project.
